

# Time Estimates & Suggestions

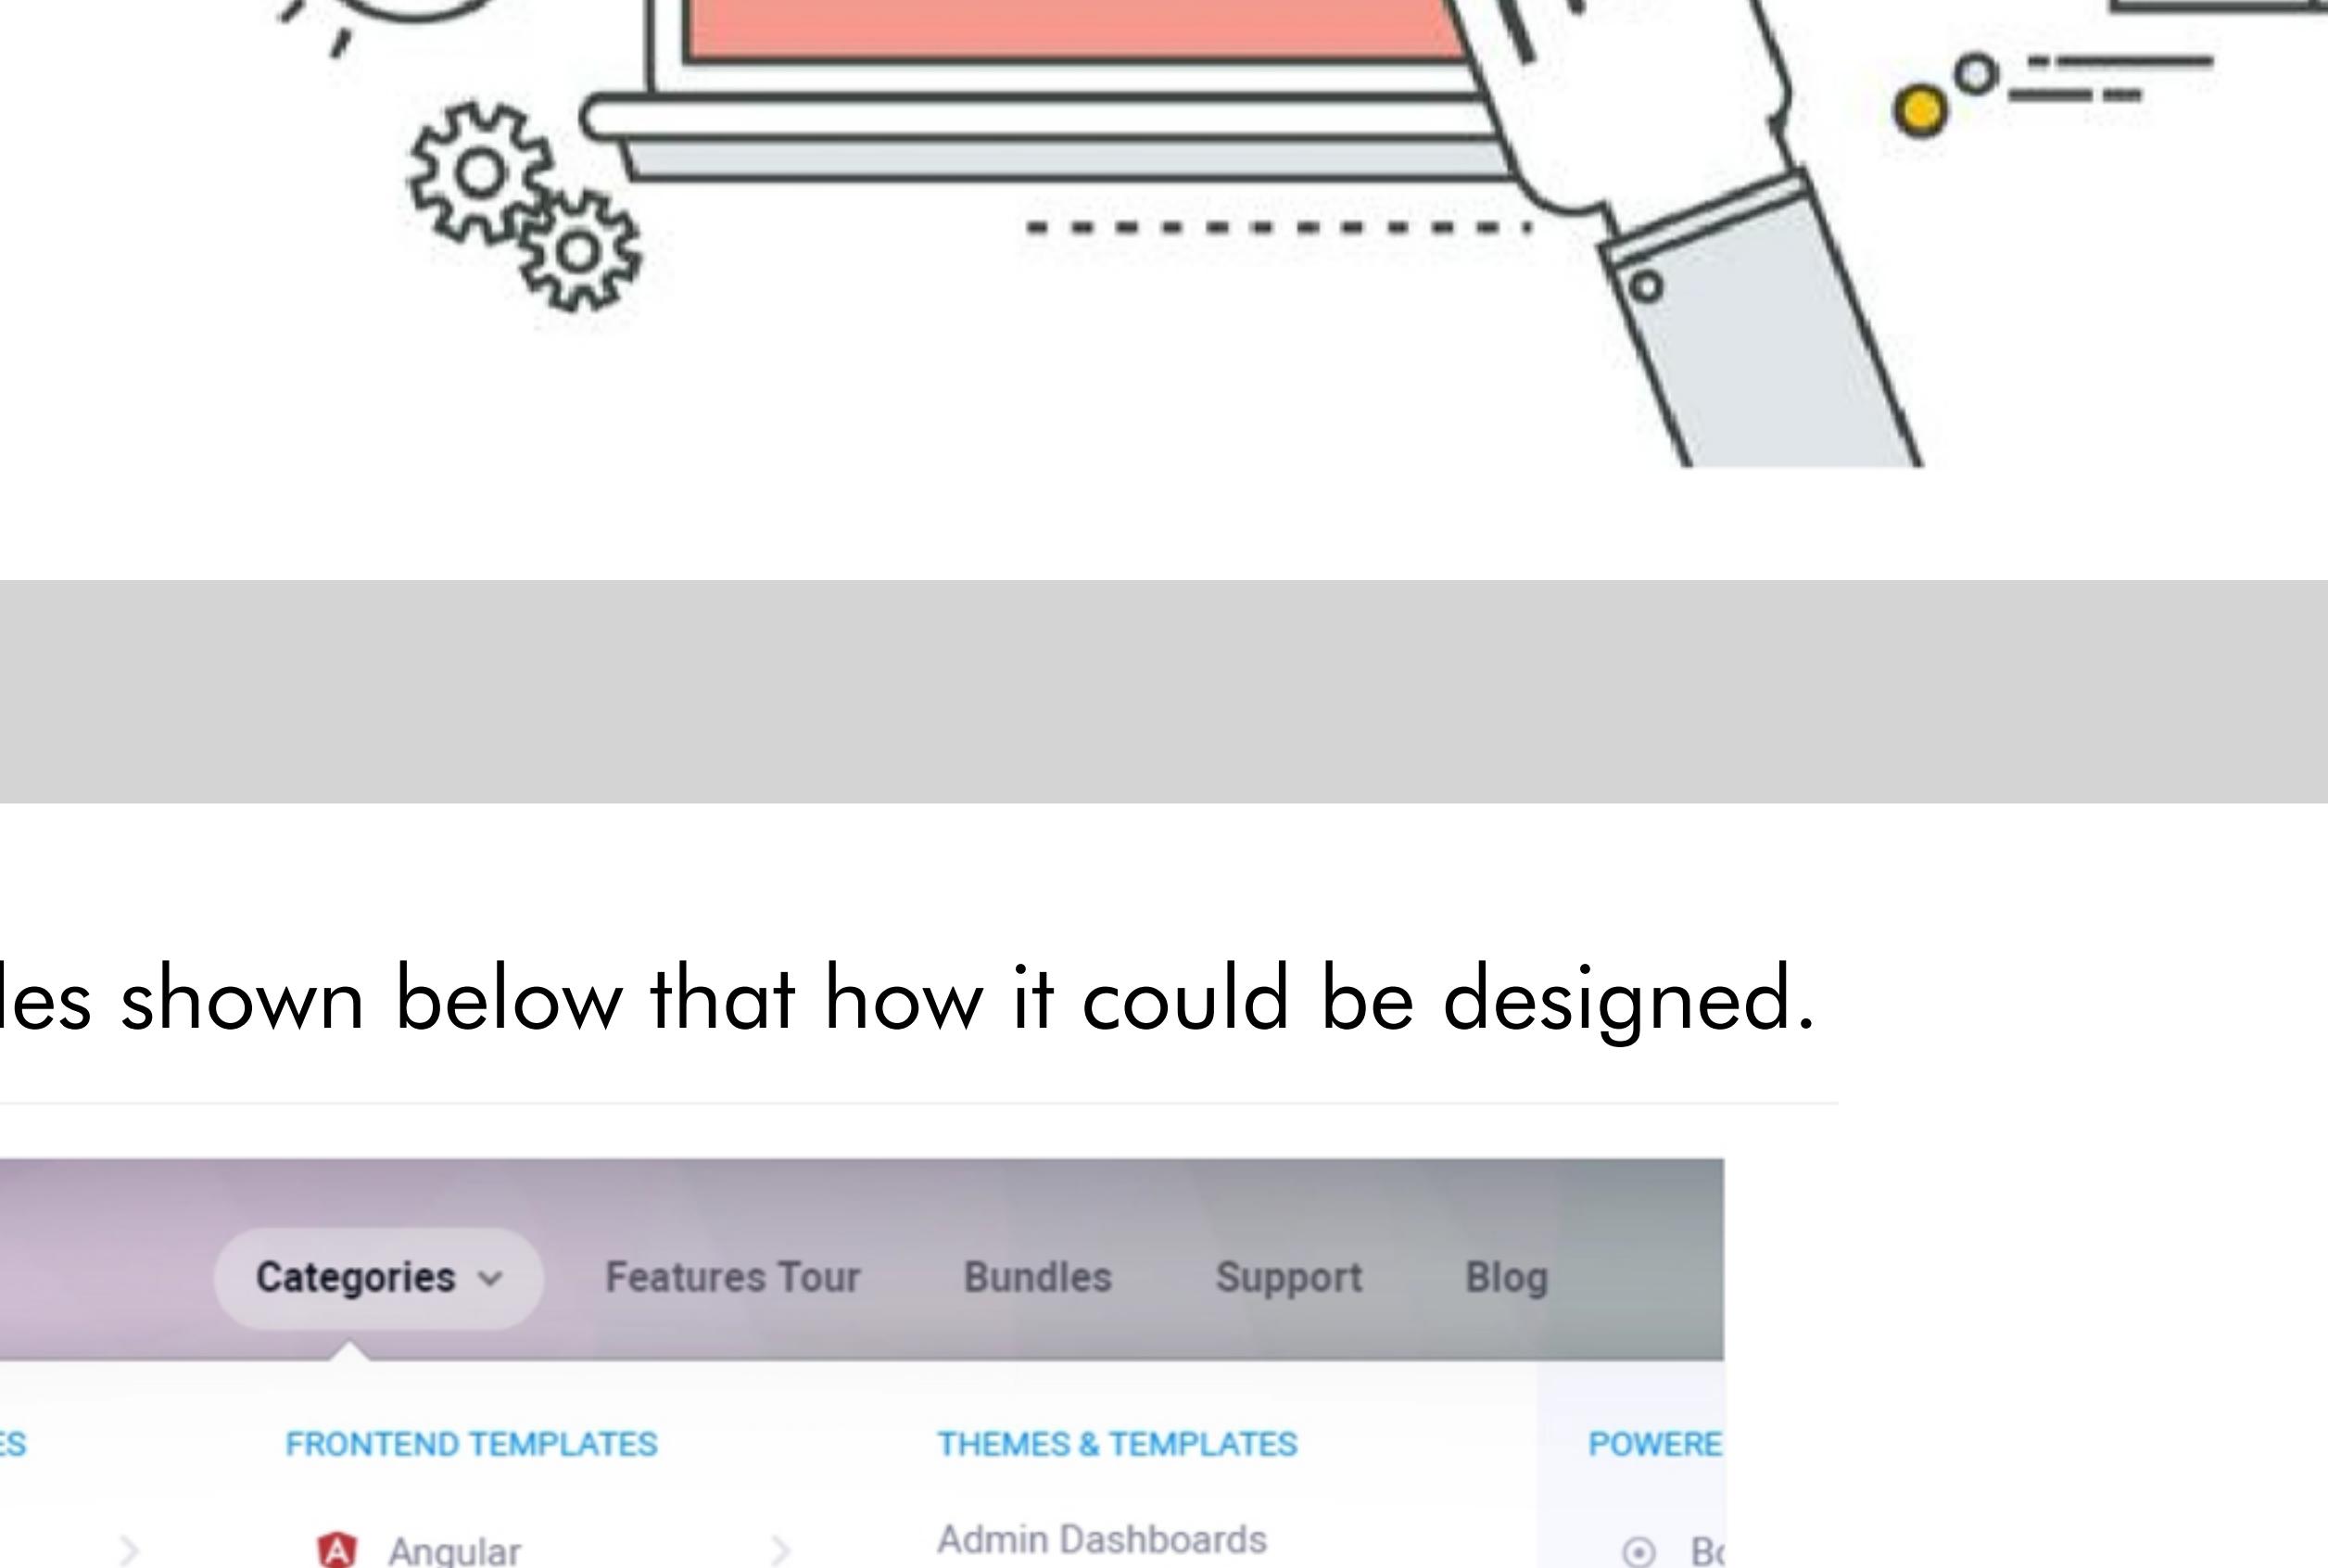

1. This will take 2-3 hours as it depends on how things will find.

- Perhaps one large header image with some of the items below
  - Does not need all items, but perhaps a garage full of stuff, or even something similar to what you had shown:

2. This will take 1hour to each icon if it will be design from scratch.

- Could be similar to the icon style on the main home page or similar:

## 3. Categories:

Here are some examples shown below that how it could be designed.

A screenshot of a website's navigation bar with tabs for "Categories", "Features Tour", "Bundles", "Support", and "Blog". The "Categories" dropdown menu is open, showing sections for "BACKEND TEMPLATES" (Laravel, Node.js, ASP.NET), "FRONTEND TEMPLATES" (Angular, HTML5/jQuery, Vue.js, React, React Native), "THEMES & TEMPLATES" (Admin Dashboards, UI Kits, Free Themes, Premium Themes), and "UI SYSTEMS" (Bamburgh UI System, Bran UI System). Below the menu, there are sections for "POWERED BY" and "UI SYSTEMS" featuring logos for SASS, LESS, HTML5, and JQUERY.

1. We can show **categories** on left side. Further their sub-categories can open in the center of mega menu. On the right side, pictures of the **related products** can be shown or related sub-categories can be displayed which can work as **quick filter** as illustrated in below screenshot.

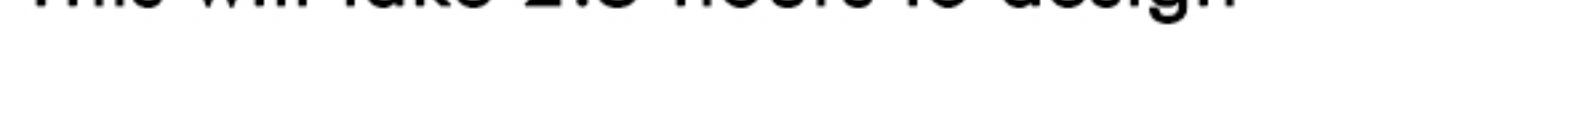

A screenshot of a website's navigation bar with tabs for "Tops", "Dresses", "Plus Size", "Accessories", "Sale", "Gift Cards", and "Explore". A "New" badge is visible above the "Explore" tab. The "Tops" category is selected, showing a grid of product images for "Crop Tops", "Neon Colours", and "Trendy Tee". To the right of the grid is a sidebar with sub-categories for Tops (Blouses, Casual, Vacation, Elegant, Workwear, Night out, Long Sleeve, Trendy, Chic, Denim, Crop, Sporty) and Blouses (Casual, Vacation, Cotton, Long Sleeve, Comfy, Trendy, Chic, Cardigan, Pullovers).

2. Moreover, the mega menu can be present by icons to show categories as shown in below screenshot.

A screenshot of a website's navigation bar with tabs for "FORSIDER", "HUSHOLDNING", "KNIVE", "SLAGTERIDSTYR", "PAKKEMASKINER", "EMBALLAGE", and "TILBEHØR". The "HUSHOLDNING" tab is selected, showing a grid of icons for various household items: Barudstyr (red background), Filmdispenser, Gryder, Kantiner, Kokkengrej, Køkkemaskiner, Kokkenvægte, Pålægsmaskiner, Rengøring/hygienje, Sauterpande, Skærebræt, Sous vide udstyr, Stegepander, and Tilbehør.

Here we can present icons in a better way as:-

- Colorful icons
- Real images in small size as shown below.

This will take 2.5 hours to design
